## Fresh power for your angle grinder

### Dronco's new flap disc portfolio

(Wunsiedel). Powerful, durable and economical that is the new range of flap discs from Dronco introduced at Cologne Hardware Fair from March 4<sup>th</sup> to 7<sup>th</sup>, 2018. Besides already existing and long proven products Dronco added a number of innovative new discs to the portfolio bringing the total flap disc range to 136 items.

Highlights are the new top products Evolution Cera Maxx and Evolution Zircon Maxx. The use of innovative, high-quality abrasive material impressively increases the service life and aggressiveness of these new flap discs. Grinding additives enable a particularly cool, friction-optimized grinding on stainless steel. This saves time and improves surface quality. Further advantages for the user are more comfortable handling, faster work progress and maximum economy.
