Polishing Compounds Bovine and Animal Fat Free

Compounds for the medical industry

(Burgwald). Osborn has combined the experience of Unipol[®], Langsol[®] and Canning[®], to develop a full range of high performance polishing compounds for the medical industry: “OSBORN MEDICAL[®]”.

Using top quality minerals and animal free fats, cutting, polishing, colouring and superfinishing compounds are available to achieve a variety of finishes on stainless steel, titanium, precious and non-ferrous metals, as well as plastic and acrylic surfaces. All compounds are animal fat free and free of animal tissue. They do not contain quartz, cadmium or lead and are in compliance with the requirement demands of FDA directives, TOSCA and REACH. With this, the new assortment is suitable for polishing surgical instruments, orthopedic implants, dentures or prosthetic devices.
